

# FORECASTED BALDWIN PARK KEY WELL ELEVATION (THROUGH JUNE 30, 2018)

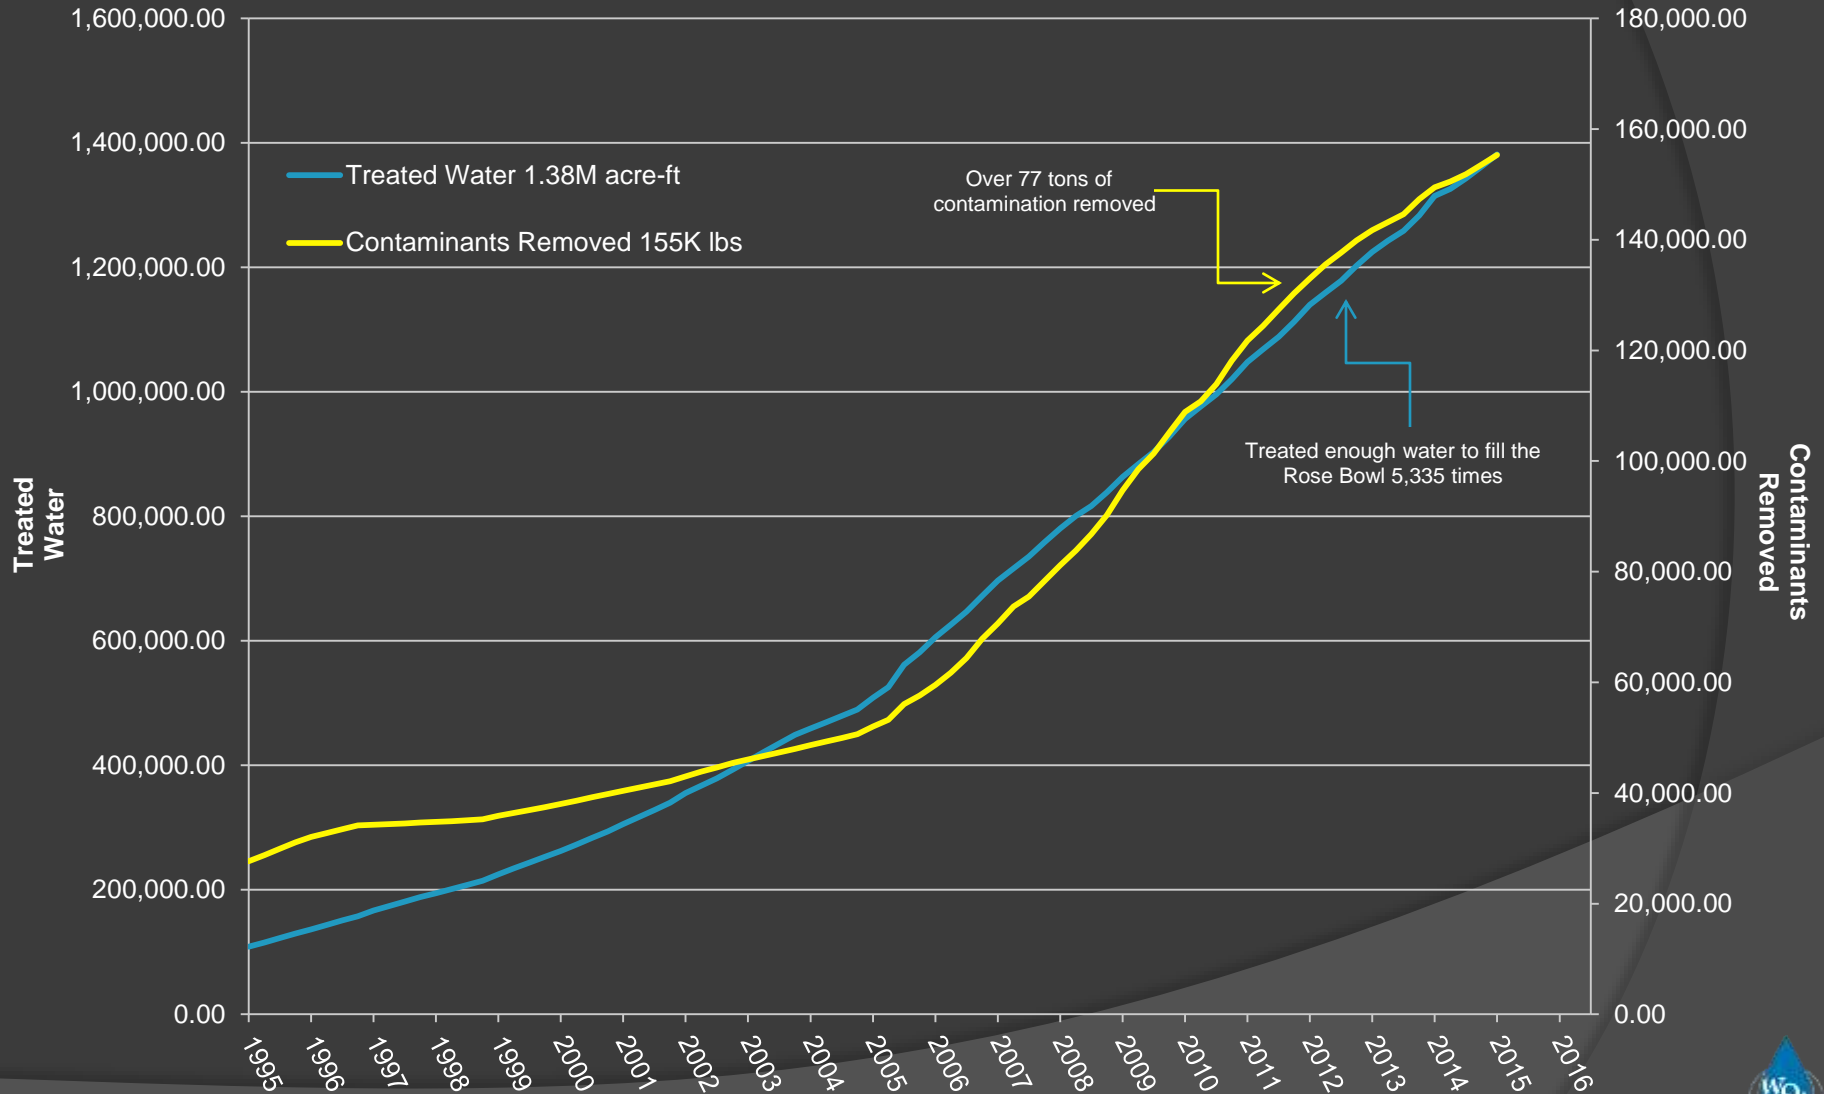

Note: Assumes OSY of 150,000 AFY for next three years and production of 225,000 AF for FY 2015-16, 232,500 AF for FY 2016-17, and 232,500 AF for FY 2017-18.

1/ Years with rainfall of 38 inches or more had about 300,000 - 400,000 acre-feet of local runoff and Key Well elevation increased about 45 feet. It is assumed a high El Nino year will have 10 percent more in elevation increase.

2/ Years with rainfall of 30-38 inches had about 200,000 - 230,000 acre-feet of local runoff and Key Well elevation increased about 25 feet. It is assumed an El Nino year will have 10 percent more in elevation increase.

# Contaminates Removed

As of 10/1/2015

# Funding Sources To Date

State	Local Resources	Federal	RPs
3.7%	9.6%	12.5%	74.2%
